EDITOR'S NOTEBOOK

Dear Archie Readers,

The ever-present love triangle between Archie, Betty and Veronica, has become the main ingredient for many of the stories you've come to love and enjoy. But there's another ingredient that has been included lately, it's called "Cheryl Blossom." Now Cheryl lives in another part of town, shows up occasionally and causes all kinds of grief for Betty and Veronica, by trying to divert good ol' Archie's attention. And that she does very well. But, she goes away and attends school at.....RIVERDALE HIGH?!? Yes, it's true. And if you read Cheryl Blossom #11, you'll know what I'm talkin' about. Cheryl is now a regular student at RHS. Guess what? She's not going away so fast, although I'm sure Betty and Veronica may have some ideas about that.

Let's turn our attention to the latest issue of Cheryl Blossom (#12). Being a new student at Riverdale, Cheryl decides to become involved in some extracurricular activities; namely, the school newspaper. Can you see the possibilities?.....Is Mr. Weatherbee really an alien?.....Will Cheryl turn the Blue & Gold into a sleazy tabloid? This is journalism that can only be delivered by that radical redhead. Don't miss it. On sale February 27th.

Did you ever wish that you could go back in time? Imagine how well you would do on your history exams. In a story called "Riverdale Revisited," Betty finds an unusual pair of glasses. When she puts them on, she is instantly transported back to historical Riverdale. While in the past Betty saves a young boy from drowning. You'll be astonished when you find out just who that boy was. This story appears in Betty #61, on sale next month.

Our Solar System

Our solar system is made up of the sun, Earth, moon, Neptune, Venus, Uranus, Pluto, Mercury, Saturn, Mars and Jupiter. The sun is the largest object in the solar system. The asteroid belt surrounds the sun and the planets near it. Mercury is the closest planet to the sun and Pluto is the farthest. The moon is the closest to Earth, and the Earth is the only planet known to have life on it. Saturn is one of the coldest planets and Uranus is the closest to Saturn. Saturn and Uranus are the sixth and seventh planets from the sun. There are only 2 planets colder than them - Neptune and Pluto. Jupiter is the largest planet and has lots of volcanoes. Pluto is the smallest planet and Uranus is the third largest planet. Venus is the planet closest in size to the Earth.

Cats

Cats are mostly known to be an animal that just eats and sleeps, but that's not true. Cats are also very active. Before cats were tame enough to be pets, they had to hunt for their own food. They would either pounce or sneak up on their prey (usually a mouse or bird). Depending on what kind of taste your cat develops will determine what they eat. Cats will also be affectionate and show respect for their master as well as loyalty.
